MESS HALL #620, MCRD SAN DIEGO CA

Best Field mess:  
CLR 27, 2ND MLG CAMP LEJEUNE NC

[IFSEA Registration](#)  
[Award Winners Message](#)

## **MCFMIS**

Food Teams continue to implement the MCFMIS (Windows based) upgrade. Parris Island is scheduled to be completed at the end of November and Camp Lejeune will begin implementation during the first week of December. Progress has been slow due to a number of factors. One of which is ensuring mess halls have connectivity to the internet. Commands need to ensure that this step has been taken prior to the Food Teams arrival. If connectivity or hardware status changes from previous submissions contact the Operations Officer or Ken Barnes.

## **Culinary Institute of America**

Through the efforts of MGSgt Johnson, TECOM has begun to fund seats for the CIA course. The intent of this course is to reward our Marines that have demonstrated superior performance in our field. Details of the course availability dates and allocations will be published under separate correspondence.

## **Training and Readiness Manual**

The training and readiness manual has been signed. It can be found on the LFS-4 Web site under the Orders column. This document will be used to make appropriate changes to the courses offered at Ft. Lee. [Click here](#) to go to the LFS-4 web page.

## **Combat Feeding Research and Engineering Board**

CFREB meeting was held during the first part of November at Natick. The meeting covered a number of topics which included:

- Performance Enhancements for the MRE's
- Nutritionally Optimized First Strike Ration
- Packaging Technologies
- Waste to energy technologies
- First Strike Ration

Many other topics were discussed. If you want to know more about what Natick is researching and developing go to: <http://hotchow.natick.army.mil/> and click on the Combat Feeding link.

## **Soda Contract Survey**

DSCP has been conducting Soda Contract surveys IOT to provide better service to all services. The link below is provided for you to provide them with input positive/negative. This link can be used now and in the future to report problems with your soda delivery, quality or satisfaction. Click on this link to go to the survey - [SODA SURVEY](#).

## **Pineapple availability**

Do to shortfalls in the pineapple crops the canned chunk and sliced pineapples will not be available in the near future. Once current stocks at your Prime Vendors warehouse are depleted the only canned pineapple available will be crushed. This relates to the canned pineapple only - fresh pineapple is still available.

## **JWOD Name Change**

The Javits-Wagner-O'Day Act (JWOD) has changed its name to "Ability One" for those of you who interact with the NIB/NISH industries.

## **CONUS Master Menu**

The new CONUS Master Menu is currently scheduled for a January 2007 implementation, coinciding with the MCFMIS upgrade. The long-awaited project will incorporate a totally revised 21-day menu with a new and innovative fast food format.

## **RGFSC QASP**

A new QASP (Quality Assurance Surveillance Program) format has been developed reducing the thirty-three required services to nine performance objectives. The initiative will place a heavier burden on the contractor to perform their own quality control, and is in keeping with the DoD policy on the performance-based contracting. Testing is scheduled to begin in the 2d Qtr FY-07 with a projected implementation of 3d Qtr FY-07
